1. e-File No.: GAD01-AR0MISC/10/2024-AR, Computer No. 2530541.

ORDER:

The Artificial intelligence (AI) is the simulation of human intelligence processes by machines, especially computer systems. It includes learning, reasoning, and self-correction. AI systems work by ingesting large amounts of labeled training data, analyzing that data for correlations and patterns, and using these patterns to make predictions about future states.

2. The Ethical Artificial Intelligence (AI) in governance refers to the development and implementation of AI systems that prioritize transparency, accountability, fairness, and human rights. This approach ensures AI technologies are designed and used to benefit society while minimizing potential harm.

3. The Planning Department, in the reference, requested the ITE&C department to furnish Action Taken Report on the following two action areas relating to "AI in Governance":

I. *"To assume global leadership towards a framework for Ethical Artificial Intelligence with guardrails of inclusiveness, non-biasedness, leveraging position as the lead chair of Global Partnership on Artificial Intelligence (GPAI) 2024.*
II. *To create Task Forces so that other parts of Government are educated in AI and its usage expands systematically".*

4. To ensure that the other parts of the Government are educated in AI, and its usage expands systematically, the Government hereby constitutes the “Task Force Committee" with the following members:
